

Simply put ...
it's **So Much Better!**

Allworx has done it again. With a barrage of new system software, advanced software options and third-party product support, Allworx has moved above and beyond the competition by providing the utmost in mobility, efficiency and flexibility to businesses.

> Advanced Software Options

NEW! Automatic Call Distribution

Distribute calls from defined queues in linear priority, round robin, or longest idle modes. Monitor real-time queue statistics and access an assortment of new tools for managing agent productivity.

NEW! Advanced Multi-Site

Extend powerful new system features across multiple Allworx sites.

- Global call routes to other sites — including handsets
- Monitor BLF status of handsets from other sites
- Global directory across all sites
- Unified voicemail across all sites
- Additional Auto Attendant flexibility
- Real-time monitoring with failover

NEW! Allworx Mobile Link

Access your Allworx system via the iAllworx™ application on Apple iPhone and iPod Touch platforms.

- Modify conference calls
- Check, send and manage voicemails
- View and modify presence setting

allworx®

Supercharge your Allworx system with these **POWERFUL ALL-NEW FEATURES**

> System 7.1 Software Upgrade

User Features:

911 Alert Support — Sends immediate audible and visual alerts to designated handsets whenever an emergency 911 call is made from any handset. Also supports optional email and cell phone alerts.

Announce Only Call Answering — Answer only option allows outgoing information only announcements.

Voice Activity Detection on Message Recordings — Eliminates dead air voicemail messages.

Anonymous Call Handling — Incoming calls with blocked caller ID information are automatically routed to a designated extension.

Wireless Headset Support — New functionality to support wireless headsets on Allworx 9212 and 9224 phones without the need for a mechanical lifter.

> Third-party Interoperability

Multi-Tech FAX Server Support¹ — Directly connect Multi-Tech FaxFinder to an FXS port and route faxes directly to system users as PDF attachments to emails.

1. Requires use of Multi-Tech FaxFinder fax server.

Administrative Features:

Enhanced Import/Export of Settings — Increases functionality of User and Handset Import/Export feature.

Voicemail Recordings Import-Export — Supports the importing and exporting of voicemail greetings, announcements, and name recordings.

Phone Automatic VLAN Settings — Supports automatic VLAN setup through the support of Cisco Discovery Protocol (CDP) and Link Layer Discovery Protocol (LLDP).

Phone Web Administration Settings — Modify handset configuration info through a web browser.

Simplified Software Installation — Download software updates directly through your web browser, eliminating the need for an FTP window.

Internet Call Access Key Eliminated — No longer need software key to send & receive phone calls over the Internet.

> Allworx Software Maintenance

Let the Allworx Software Maintenance plan take away all of your worries about the cost of future software upgrades.

Known throughout the industry for compelling software enhancements, the best way to stay up-to-date on your new Allworx system is with an Allworx Software Maintenance plan. Now, every time you become aware of all the great new productivity enhancing applications, you can comfortably implement them without the added worry of the incremental cost.
